## Alphabetical Table of Contents of Titles

- Altruism and organism: disentangling the themes of multilevel selection theory. David Sloan Wilson, S122
- Altruist cheater dynamics in *Dictyostelium*: aggregated distribution gives stable oscillations. Anagha M. Matapurkar and Milind G. Watve, 790
- Balanced dispersal between spatially varying local populations: an alternative to the source-sink model. C. Patrick Doncaster, Jean Clobert, Blandine Doligez, Lars Gustafsson, and Etienne Danchin, 425
- Clutch-size behavior and coexistence in ephemeral-patch competition models. Stephen B. Heard and Lynne C. Remer, 744
- Comparisons of physiological performance in sexual and asexual whiptail lizards (genus *Cnemidophorus*): implications for the role of heterozygosity. Alistair J. Cullum, 24
- Cost of chemically defending seeds: furanocoumarins and *Pastinaca sativa*. A. R. Zangerl and M. R. Berenbaum, 491
- Currencies for foraging based on energetic gain. John M. McNamara and Alasdair I. Houston, 603
- Disentangling effects of induced plant defenses and food quantity on herbivores by fitting nonlinear models. William F. Morris, 299
- Distribution, diversity, and latitude in African primates. Guy Cowlshaw and Jocelyn E. Hacker, 505
- Does sociality drive the evolution of communicative complexity? a comparative test with ground-dwelling sciurid alarm calls. Daniel T. Blumstein and Kenneth B. Armitage, 179
- Effect size in ecological experiments: the application of biological models in meta-analysis. Craig W. Osenberg, Orlando Sarnelle, and Scott D. Cooper, 798
- The effects of conspecific attraction and habitat quality on habitat selection in territorial birds (*Troglodytes aedon*). K. L. Muller, J. A. Stamps, V. V. Krishnan, and N. H. Willits, 650
- The effects of herbivory on paternal fitness in scarlet gilia: better moms also make better pops. Peg A. Gronemeyer, Brian J. Dilger, Juan L. Bouzat, and Ken N. Paige, 592
- Evolution of a species' range. Mark Kirkpatrick and N. H. Barton, 1
- The evolution of indicator traits for parental quality: the role of maternal and paternal effects. Jason B. Wolf, Allen J. Moore, and Edmund D. Brodie III, 639
- Evolution of prolonged development: a life table analysis for periodical cicadas. Richard Karban, 446
- Evolution of reproductive effort in a metapopulation with local extinctions and ecological succession. Ophélie Ronce and Isabelle Olivieri, 220
- The evolution of self-fertilization in perennials. Martin T. Morgan, 618
- Evolution of the individual. Richard E. Michod, S5
- Experimental studies of group selection: what do they tell us about group selection in nature? Charles J. Goodnight and Lori Stevens, S59
- Female mate choice tactics in a resource-based mating system: field tests of alternative models. Mary L. Reid and Judy A. Stamps, 98
- Functions of fights in territory establishment. Judy A. Stamps and V. V. Krishnan, 393
- Honey bee colonies are group-level adaptive units. Thomas D. Seeley, S22
- Host heterogeneity in susceptibility and disease dynamics: tests of mathematical model. Greg Dwyer, Joseph S. Elkinton, and John P. Buonaccorsi, 685
- Impact of the human egalitarian syndrome on Darwinian selection mechanics. Christopher Boehm, S100
